

INFRASTRUCTURE COALITION

INFRASTRUCTURE COALITION

A PROGRAM OF THE FLORIDA CHAMBER OF COMMERCE

The Florida Chamber's Infrastructure Coalition is focused on unifying the business community around long-term investments in Florida's energy, water, transportation, telecommunications, and agriculture infrastructure.

With 25.5 million people expected to call Florida home by 2030, a growing Florida means a growing need for infrastructure to support our economic growth and increasing number of residents and visitors. This growth will be a future challenge or opportunity depending on the policies and investments advanced today. Following the passage of the \$65 billion Infrastructure Investment and Jobs Act, the Florida Chamber's Infrastructure Coalition aims to ensure that Florida maximizes the monetary opportunities to support Florida's growing economy and population. At the state level, the Infrastructure Coalition promotes forward-thinking and science-based policies and investments in Florida's infrastructure to keep Florida competitive and connected.

The Florida Chamber's Infrastructure Coalition is leading the discussion by focusing on the following areas:

- **Next Generation Mobility:** Creating a robust, safe, resilient, and modern transportation system that responds to the latest technological advancements and emerging trends.
- **Economic Connectivity:** Encouraging the development of rural infrastructure and future corridors that are cross-sector focused – addressing energy, digital and connectivity gaps.
- **Global Opportunity:** Promoting strategic infrastructure investments that support and expand global market access and position Florida as the hub for trade and logistics.
- **Environmental Sustainability:** Supporting science-based policies for water, land use, and energy solutions that protect Florida's unique natural resources and promote sustainable economic growth.

To be successful in developing and securing future investments in Florida's infrastructure, we need collaboration across diverse industries and unified advocacy by the business community. Your participation in the Florida Chamber's Infrastructure Coalition can help Florida remain globally competitive, expand our economy, and increase the quality of life for new residents and generations to come.

Infrastructure Coalition membership benefits include:

- Annual policy and advocacy discussions and in-person networking opportunities at our Transportation, Growth, and Infrastructure Solution Summit and Future of Florida Forum
- Quarterly Board of Governors Webinars
- Quarterly Infrastructure Coalition Webinars
- Bi-monthly Infrastructure Coalition Newsletter
- Legislative briefings and updates as our priority bills move and change in both Washington, D.C., and Florida's Legislative Session
